

Digital Literacy and English Education

Spring 2023

(Undergraduate course, 2 Credits)

Class schedule: Tuesdays (4-6pm)	Instructor: Miran Kim
Homepage: MK316.github.io Github account: MK316	E-mail: (mirankim316@gmail.com)

● COURSE OVERVIEW:

This course is designed to introduce students to the concept of digital literacy and its importance as a future English teacher. Digital literacy refers to the ability to use digital technologies effectively to access, evaluate, and utilize information, as well as to communicate and express oneself digitally. In particular, digital literacy skills are essential for language teachers in the 21st century, as they allow teachers to access, evaluate, and utilize effective learning materials, use AI technology to facilitate learning and provide personalized feedback, and design and deliver activities for students at different proficiency levels. By the end of this course, students will have a strong foundation in digital literacy and be well-prepared to utilize digital tools and technologies to enhance their teaching practice and facilitate the language learning of their students.

● TEXTBOOK: Online manual and readings
